

ROTTLER THE CUTTING EDGE

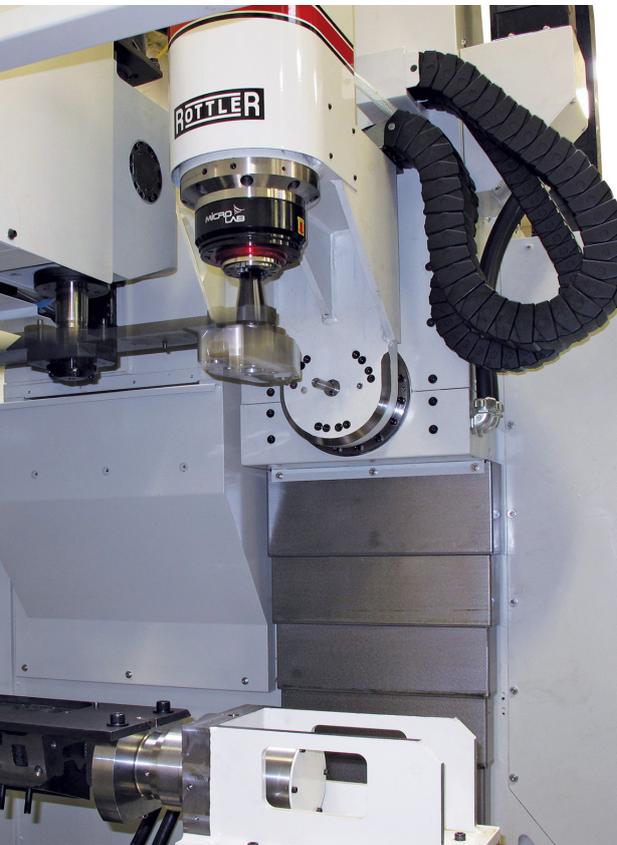

BFTI Europe

LEADING EXPERT IN
ENGINE REBUILDING EQUIPMENT

BFTI Europe

ENGINE REBUILDING TECHNOLOGY PROVIDER

BFTI Europe, UAB was founded in 2011 in Vilnius, Lithuania as engine rebuilding machine and tooling distributor.

Having had years of useful experience of running a chain of workshops prior to creating the company, our team can offer the wise choice of machines and tooling from different brands available on the market today based on its extensive knowledge of products and technologies, as well as practical business solutions.

We supply top quality machines and tooling for automotive, motorcycle, racing, industrial, heavy duty, locomotive, marine or any other type of internal combustion engines.

Long lasting reliable relationships with our customers is our priority. Our goal is to help our customers to build a successful business.

In the world of everchanging advanced technology we work with our customers to bring it to every workshop.

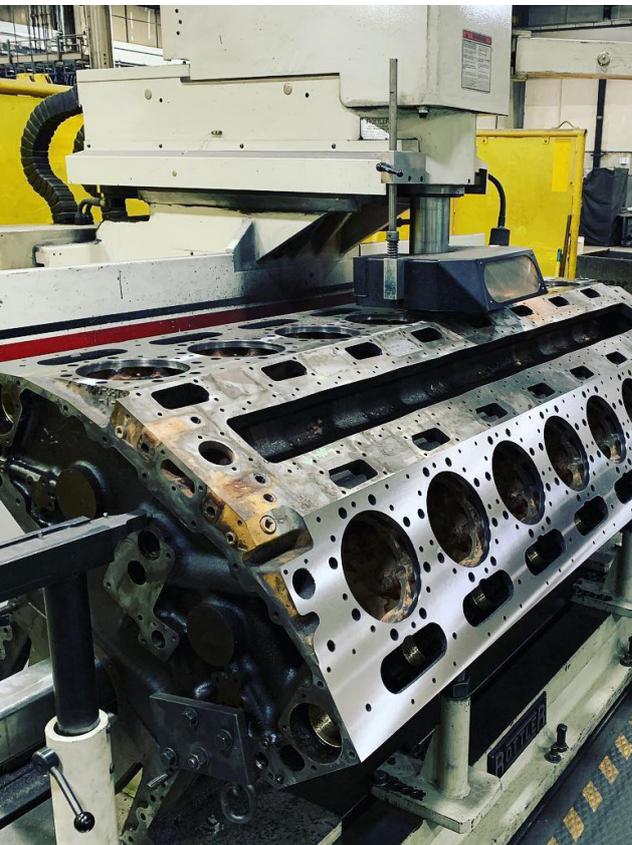

MACHINES AND SUPPLIES

Distribution of machines and tooling for engine rebuilding workshops.

SERVICE AND SUPPORT

Our company provides high quality aftersales service and support.

BFTI Europe provides comprehensive support and aftersales services.

Our international team of technicians ensures service is prompt and professional. High quality support is our distinctive feature, highly appreciated by our customers.

Whether it's a small family workshop or international brand plant, BFTI Europe will help to cater to your specific needs and challenges.

High volume of machine sales makes shipment from manufacturers regular which enables us to minimize order delivery time.

Most of the tooling and spare parts are kept in stock available for the same/next day shipping.

Every order is handled efficiently. We take pride our customers can always rely on us.

Our major suppliers:

ROTTLER **THE CUTTING EDGE**

Since 1923, the **Rottler** name has been synonymous with leading edge technology.

As Rottler distributor BFTI Europe offers a complete range of Rottler machinery for every type of engine builder, whether you have a small engine rebuilding workshop or high-volume engines remanufacturing facility, BFTI Europe can suggest proper Rottler machine, which will fulfil any workshop needs.

Thanks to unmatched dedication, diversity and innovative product development, Rottler's advanced designs and equipment continue to meet the most demanding engineering needs of engine builders and remanufacturers around the world.

Innovation has always been the main visionary objective of **AZ S.p.a.**

AZ is a leader in the production of crankshaft grinding machines of up to 14 meters in length for the energy, locomotive and marine fields. AZ has sold over 3000 crankshaft and roll grinders all over the world and this permits AZ to be called 'A Crankshaft Specialist'.

AZ's mission is to project and design machines to each and every customer individual needs and to solve the particular grinding problems specific to complex workpiece shapes. Thanks to a team of professional and leading engineers AZ has the ability to ensure advanced technological solutions and performance machines.

COMEC with over 50 years of experience, is a leading Europe manufacturer of engine rebuilding machines and tooling.

COMEC products are entirely manufactured in the Porcia plant, following a series production system.

The process starts from the machining of the rough parts using state-of-the-art CNC machines and goes through all the intermediate steps such as painting, assembling, wiring and final testing prior to storage or shipment. This ensures utter quality, wide flexibility in managing any urgency or customization, and rapid availability of any model.

Power Test

Power Test, Inc., is an industry leader in the design, manufacture and sale of dynamometers, heavy equipment testing systems and related data acquisition and control systems.

A dynamometer is a device for chassis or engine applications, designed to create a load to duplicate various speed (RPM) and torque (Nm or lb-ft) requirements. From this data, power (HP or kW) can be calculated.

When it comes to dynamometers and accessories, the number of options in the marketplace can be overwhelming. BFTI Europe together with Power Test, Inc. team will be glad to guide you through the entire process, starting with the basics.

GOODSON

Auto Machine Shop Tools and Supplies

Goodson Tools & Supplies for Engine Builders is the premier source for engine building tools and supplies worldwide. Goodson supports engines from "lawnmowers to landmovers" with dimensionally correct tooling and shop supplies.

Goodson Tools and Supplies for Engine Builders is the first choice for engine building tools. No matter what engine machining you're doing: crankshaft grinding, cylinder honing, valve seat cutting, valve guide sizing, valve spring work, etc., Goodson has what you need when you need it. In addition to its own exclusive products, Goodson carries engine building tools and supplies from companies like Sunnen, Neway, Mitutoyo, Irontite, AV&V and Starrett.
